We are prepared for the Flood Tide of Spring Dress Goods business.

Our showing will surpass previous seasons. Natural with a progressive business we're always bettering, always raising the standard of values. Continually planning to better qualities and everlastingly lowering the price. The Dress Goods will immediately prove conspicuous by the absence of ordinary weaving and designs. Our styles in a great measure are to be seen here only, so you can enjoy exclusiveness and at the same time pecuniarly profit by coming here.

These big values for next Monday:

Blue and Black, Green and Black, Brown and Black and Heliotrope and Black Waffle Cloth, very desirable for skirts or entire dresses, a limited quantity only. Worth 50c. At 29c. yard.

All-wool Cheviots, Checks and Snow Flake Mixtures, all colors and a big variety of weaves. Monday only 221c. yard. Worth 36c.

The color blendings, weavings and general great attractiveness equals, and in many instances surpasses the high priced fabrics shown about town. The predominant styles are Waffle Checks, Honeycomb effects, Shepherd Checks, Dogear Checks, Serges, Henriettas, Scotch Fancies, etc., etc.

The 50c. Melange and Vigaureux Suitings have been acknowledged the superior to any in town at 68c. and 75c. There's only one answer to why we are a little lower in price-we imported these direct-you save the jobber's

A Man Held Up and Robbed-S

Arrests-The New Union

The new Union depot at 36th and M streets is rapidly nearing completion, and in a few months will be ready for occupancy. When completed it will stand as a nonument to engineering and will be one of the best apportioned buildings of its kind in the country. The floors have all been laid with cement, and the structure throughout is entirely fire-proof. In the building there is a large elevator, which will convey cars from one story to another, while there are other elevators for the use of the public. A clock will be placed in the main central tower, which will be visible for some distance around. Perhaps the best feature of the new building is the roof, which will afford a delightful promenade during the hot weather. The view from the elevated position will be magnificent, and the breezes coming from the river will temper the heat of the land. The floor of the promenade is almost on a level with Prospect avenue, and is surrounded by an ornamental coning. In the rounded by an ornamental coping. In the center of the roof, a one-story entrance of the Prospect avenue side, extends the entire length, from north to south, practically dividing the roof in two, and making as many proposed or south.
